Hum Eliminator™

Silence AC hum, forever!

Do you hear a hum or buzz in your audio signal? Are long unbalanced lines across stage creating noise problems? Get the Hum Eliminator™ from EBTECH.

Almost all AC hum (60Hz in the US), is caused by ground-loops. These groundloops act like radio antennae picking up hum and noise. The Hum Eliminator™ completely eliminates this by breaking the groundloops, making it impossible for the signal lines to pick up the AC hum and noise in the first place.

Just plug the Hum Eliminator™ into the signal lines between offending pieces of equipment and you're done. Quick and easy.

No buzz, no hum. No signal degradation. No filtering. No noise gates. No dangerous ground lifts.

Line Level Shifter™

Solve your -10dBV to +4dBu problems, now!

What do you do when you need to connect a low volume, -10dBV output (like a cassette deck, CD player or synthesizer), into a high volume, +4dBu input (like a multi-track recorder or DAT machine)? Get the Line Level Shifter™ from EBTECH.

The Line Level Shifter™ uses the physics of inductance and impedance matching to increase or decrease the signal voltage without the added noise of active electronics. The Line Level Shifter™ also converts back and forth between balanced and unbalanced signals automatically. This is great because most -10dBV signals are unbalanced while most +4dBu signals are balanced.

The Line Level Shifter™ also contains EBTECH's Hum Eliminator™ technology to break the groundloops that cause AC hum.

*Both the **Hum Eliminator™** and **Line Level Shifter™** are used around the world for...*

Recording Studios • Audio/Video Production • Stereo/Home Entertainment Systems

Car/Boat Audio-Engine Noise • Live Sound Reinforcement • Computer/Multimedia Audio

Radio/TV Audio Broadcasts • All Other Audio Environments

Hum Eliminator™

- Eliminates AC hum/60Hz buzz and noise, quick and easy
- Breaks ground loops safely, while leaving all signal grounds intact
- Automatically translates signal voltages to match differences in ground potentials, avoiding clipping
- Converts automatically back and forth between balanced and unbalanced lines at either end
- 1/4" TRS "smart" jacks (tip, ring, sleeve) inputs and outputs. XLR adapters available
- Completely passive design with audiophile quality components assures the best possible noise and distortion performance
- Frequency response 20Hz to 70kHz plus or minus 0.5dB
- Distortion less than 0.005% THD @ 1kHz
- Crosstalk better than -97dB
- Maximum source impedance 1k0hm. Minimum load impedance 10k0hm
- Available in 2 channel mini box, and 8 channel single rack space versions
- 2 Year Warranty. EBTECH quality and reliability
- Made in the U.S.A.

Line Level Shifter™

- Converts back and forth between -10dBV and +4dBu
- Converts automatically back and forth between balanced and unbalanced lines at either end
- 1/4" TRS "smart" jacks (tip, ring, sleeve) inputs and outputs. XLR adapters available
- Built-in Hum Eliminator™ technology eliminates AC hum/60Hz buzz and noise
- Automatically translates signal voltages to match differences in ground potentials, avoiding clipping
- Completely passive design with audiophile quality components assures the best possible noise and distortion performance
- Frequency response 10Hz to 40kHz plus or minus 1dB into 10k0hm load
- Distortion less than 0.002% THD @ 1kHz
- Crosstalk better than -97dB
- Maximum source impedance 1k0hm. Minimum load impedance 10k0hm
- Available in 2 channel mini box, and 8 channel single rack space versions
- 2 Year Warranty. EBTECH quality and reliability
- Made in the U.S.A.
