**ADAM**  
PROFESSIONAL AUDIO

## Description:

Since their introduction to the market, ADAM studio monitors have earned an impeccable reputation with even the most critical audio engineers, and can be found in many of the worldwide leading studios and audio production facilities. The biggest contributor to this success is the unique A.R.T. (Accelerated Ribbon Technology) transducer, which remains the most integral component of the ADAM sound.

ADAM Audio is now proud to introduce the A7 two way nearfield monitor, which finally brings the acclaimed ADAM sound quality to a new lower price point. The A7 matches the A.R.T. tweeter with a state of the art 6.5" woofer that introduces a new cone material combining high rigidity and high internal damping with low weight, resulting in an extremely accurate monitor with all the clarity, detail and spectacular imaging traditionally associated with the ADAM name.

The A7 is powered by two 50W rms amps (one per driver). The front panel sports both a power switch and volume control. The rear panel houses controls for tweeter level and two shelving filters for high and low frequencies. The unit also features both balanced (XLR) and unbalanced (RCA) input connectors, allowing it to be used in almost any audio application.

Technical data	A7
Tweeter	A.R.T. Tweeter
Woofer	165mm (6.5")
Woofer free air resonance	40Hz
Woofer cone material	Rohacell / Carbonfibre sandwich
Built in amps:	2 x 50W RMS
Frequ. response $\pm 3\text{dB}$	46Hz - 35kHz
THD >80Hz	$\leq 1\%$
SPL max in 1m	$\geq 105\text{dB SPL}$
Max. musical peak in 1m, per pair	$\geq 116\text{dB SPL}$
Crossover frequency	2200Hz
Inputs	balanced XLR + unbalanced RCA
Input impedance	10k $\Omega$
Weight	8,1kg (17.8 lb)
Magnetical shielding	yes
Height x Width x Depth	330 x 180 x 280mm (13" x 7" x 11")
Warranty	2 years
